BROKERS OF THE VALLEY

IN THE GARDEN

- ◆ Turn on irrigation system, check sprinkler heads and drip lines for proper function
- ◆ Trim larger, overgrown hedges in early spring
- ◆ Remove any debris and turn your soil over to prepare for planting—2 to 4 weeks before planting
- ◆ Have a game plan on what you want to plant, when to order and which plants take longer to grow
- ◆ Have pool equipment inspected and prepare to open that pool

AROUND THE HOUSE

- ◆ Remove leaves and debris from gutters
- ◆ Power wash windows and siding
- ◆ Check all weather stripping and caulking around your doors & windows, replace if needed.
- ◆ Clean all window and door screens
- ◆ Have air conditioning unit serviced
- ◆ Refinish the deck
- ◆ Have septic tank inspected and pumped if necessary
- ◆ Examine roof shingles for any damage or missing shingles
- ◆ Check stucco and concrete for any larger cracks that need attention

INSIDE THE HOUSE

- ◆ Clean Garbage Disposal—fill with ice and run water while disposal is on, maybe a couple of times
- ◆ Vacuum heat registers and vents
- ◆ Vacuum bathroom fan vents
- ◆ Check all smoke and carbon monoxide alarms, replace batteries if needed
- ◆ Reverse your fans—if they turn counter clockwise , they'll circulate the cooler air
- ◆ Clean your carpets
- ◆ Vacuum lint from the dryer vent and clean venting tube
- ◆ Change your air filters
- ◆ Drain and flush water heater

THESE ARE JUST A FEW IDEAS AND MAINTENANCE REMINDERS TO CARE FOR YOUR HOME.

We recommend doing a professional home inspection if you are not able to fully assess your home.
